

Home Energy Efficiency Checklist

Annually

- ✓ Check your heat and A/C systems.
- ✓ Check windows and outside doors for drafts.

Seasonally

- ✓ Check furnace switch, fuse and breakers.
- ✓ Check furnace blowers, oiling motor and changing belt if necessary.
- ✓ Check thermostat accuracy by taping thermometer to wall next to it. If discrepancy, have serviceman re-calibrate unit.
- ✓ Check central A/C condensing unit for obstructing leaves and debris, and hose out if necessary.
- ✓ Keep shrubs pruned back to maximize air flow.
- ✓ Check room A/C condensate drain outlet for plugging.

Monthly

- ✓ Check and clean/change room A/C filters.
- ✓ Check room A/C condenser coils and intake vents for obstructions.
- ✓ Check furnace filter and change if clogged.

General

- ✓ Check insulation for type/thickness, beginning in attic/top floor. Upgrade if inadequate.
- ✓ During humid weather, check central A/C condensate drain to ensure it's carrying off excessive moisture.
